KOVAX ®

2024-2025

100 years of history, 100 years of company

Kovax corporation has contributed in sanding and finishing in all manufacturing processes. Every year, the market is in increasing demand for higher quality, firm, consistent and reliable work processes. To meet these needs, we have worked with experts from all over the world who have long been involved in research and development and marketing of coating abrasives to share systems designed to create higher-precision products. As a result of these efforts, you can work in a more pleasant and clean environment. This is what we call an environmentally friendly process system.

Centered on technology, the Kovax world family is joined by partners from 45 countries around the world. We do not hesitate to explore new technologies and have built strong ties based on mutual respect and trust. The Kovax family works together, shares knowledge, and strives to build a stable future in a changing marketplace.

Because together, we are strong and can face any challenge.

The pinnacle of perfection

Kovax is a global technology company in ultra-precision cutting. Our products are essential in all areas of the world, such as cars, motorbikes, boats or aircraft.

We look at value beyond performance. Reducing time in the production process is an important key to success throughout the entire process. Easy workability and control as desired means less risk and more pleasant work environments, as well as less stress on workers. We place a higher value on saving time and quality control that can be brought about by using our products, rather than expanding the market, eventually leading to lower costs. In addition, through our close relationship with our partners, we know and understand what products are needed in the workplace and what is important in the process. Based on these data, we create a single system that runs through all processes, providing various solutions for each part to work closely with each other to ensure that the project is successfully completed.

SINCE 1930

Craftsmanship pursuing the highest quality

DNA, which aims for the highest quality, has long been rooted in corporate culture. We pursue this through the highest performance products and customer support.

Craftsmanship is a special legacy of Kovax. We seek perfection in a state-of-the-art ESG factory that combines innovative production technologies with nearly 100 years of total sanding solution development and production experience. As a result, a total sanding line has been created that allows dry sanding of even fine particles. Clean, reliable, and highly uniform processing has enabled us to save time as well as innovative production. Pursuing perfection means thinking one step ahead. How can I make tomorrow's work easier and more efficient? Or ask what sanding solutions you can offer for new applications, new materials, new materials, etc.

Top Abrasives Family.

The management philosophy of Top Abrasives Co., Ltd. is 'shared growth' and 'trust'. We strive for long-term cooperation based on mutual respect and trust. We work together, share knowledge and have mutual respect for each other's markets. Based on this trust, we create new business opportunities for each other, expand each other's success, and realize continuity as a going concern. We strive for a better future than today, especially in rapidly changing market conditions. Together we can stand strong and face any challenge. All of you are part of the family of Top Abrasives Co., Ltd. and Kovax.

Specially developed diamond abrasive for tough OEM E-coat primers

The Super-Tack film backed Magic Disc utilizes top quality diamond abrasive grain and next generation anti-clogging technology, providing an unbelievably long sanding life. With its high performance cutting speed, Magic Disc is ideal for sanding on all types of very hard coating surfaces while still maintaining its uniform finish.

- Sand and break-through tough OEM E-Coats
- Scuff very hard matte clearcoats
- Diamond abrasive grain
- Extremely long sanding life
- Uniform finish

Sanding Hard Factory E-Coats ▶

It is common for manufacturers to use an extra hard ED (Electrophoretic Deposition) coating or E-Coat on new factory metal parts. Sanding on this hard coating is difficult for regular abrasives. Magic Disc with its diamond abrasive grains is specially developed to "open" this extra hard layer.

The superior durability of the diamond abrasive grains means a single Magic Disc can complete ED sanding for multiple vehicles.

The World's Most Advanced DRY Sanding System...

Super Assilex features Fast and Uniform coverage with extremely shallow scratches, resulting from the combination of an Ultra Flexible bonding and Super Sharp abrasives. Ideal for light sanding on all types of surfaces that demand shallow scratches and a uniform finish that can still be done in the shortest time.

- Extremely shallow scratch pattern, safe from "over-sanding"
- Fast and uniform coverage, leaves no unsanded areas
- Time saving of 50% or more, thus greatly improving productivity
- Ideal for Waterborne and High Solid Paint Systems

Tolex Stickon (Block Sanding)

Topcoat sanding will be faster and more efficient as dust nibs are easily identified and located in the first pass of light sanding with Tolex. These imperfections are then quickly and effectively removed by continued sanding on needed areas only. Therefore, over-sanding as well as overlooked dust nibs can be easily avoided.

Premium film-backed finishing disc that cuts fast & uniform

Long lasting high performance Yellow-Film discs cut extremely fast and uniform. Designed for use in topcoat sanding to remove excess orange peel, over-runs, and dust nibs. Can also be used for light scuff sanding before painting. The Super-Tack system provides cooler sanding and the convenience of easy on and off from disc pad.

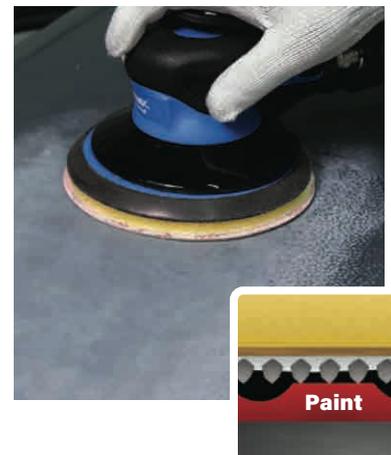

- Special Anti-Clogging Process
- Fast Cutting, Longer Disc Life
- Light Sanding Before Polishing
- High Performance Film Backing
- Uniform Finishes

Correct Paint Texture

The rigid film backing of Yellow-Film enables the 'block sanding effect' that flattens texture fast and uniformly.

What's Next? Super Buflex

After sanding with Yellow-Film, refine the topcoat with Super Buflex. Achieve a mirror finish with dramatically reduced buffing times.

Tolecut Touch-Up

Eliminate imperfections, not your topcoat...

The Tolecut Touch-Up system utilizes state of the art Dry Lube technology to prevent both loading and deep scratches. This dry application allows constant progress monitoring for delicate jobs. Nibs and runs can be eliminated effectively and efficiently.

- Fast & Efficient Cutting Power
- Extremely Shallow Scratches
- Ideal for Waterborne and High Solid Paint Systems
- Dry Application Allows Easy Progress Monitoring

Super Buflex

CONVENTIONAL P3000

When compared to equivalent grit abrasive papers, Super Buflex not only delivers a shallower scratch pattern, but also one that is more uniform.

Clog-Free Dry Sanding

Fast & uniform coverage

◀ Preserve OEM Texture

Due to its extreme flexibility, Super Buflex can polish both the inside valleys and peaks of orange peel without eliminating it completely. The shallow scratch pattern will also prevent over-sanding in situations where the thickness of topcoat is a concern.

Super Buflex Interface Pads ▶

Utilize a special soft "Hook & Loop" system to minimize sanding hotspots and avoid deep scratches. Achieve the most uniform and shallow finish that can be polished in the shortest time.

STICKON (PSA)

SUPER-TACK (Hook & Loop)

Hi-Tech Products **K-SYSTEM**

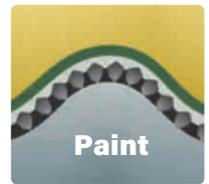

As finishing technology continues to advance, quality demands in coated abrasives are higher than ever before, especially for fine sanding. Besides longevity and cutting speed, a uniform finish with shallow scratches is essential for today's New Generation painting technology.

Shallow & Uniform Scratches

Shallow & Uniform Finish

Hi-Tech Flexible Bonding technology allows the abrasive stones to contour to the peaks and valleys of the sanding surface, resulting in extremely shallow and uniform scratches. Flexible sanding is ideal for all light sanding applications including but not limited to: scuffing, finishing, blending, and polishing.

Speed of a Faster Grit

When compared to equivalent grit abrasives, K-Number abrasives cut faster while delivering a shallower and more uniform finish. Simplify your multi-step sanding process with K-number abrasives and reduce both material and labor costs.

Save on time and materials, but most importantly... labor cost.

Speed of a Faster Grit, Finish of a Finer Grit

K-600 cuts as fast as **P320**, but finishes like **P600** or finer

Effective Anti-Clogging

Total DRY Sanding

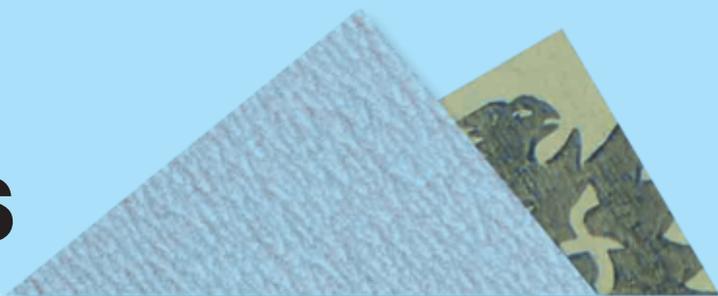

Advanced anti-clogging technology is integrated into the abrasive surface, resulting in longer-lasting, clog-free sanding that improves finish quality and reduces the chance of deep irregular scratches. From paint prep to polishing, Total DRY sanding is possible without compromising a uniform finish, unlocking major time savings and compatibility with waterborne paint and other next generation coatings.

(Note: Cutting speed and Final finish vary depending on the method of sanding and the condition of the sanding surface.)

Dry Sheets

Aluminum Oxide (AO)

Get a consistent and uniform finish with these long lasting dry sanding sheets. Full resin bonded premium aluminum oxide abrasive grains cut fast and highly resist clogging. Extra soft and flexible backing for better hand sanding needs.

Silicon Carbide (CC)

Highly resistant to clogging, these long lasting dry sanding sheets are designed for both machine and hand sanding on all types of surfaces. Full resin bonded silicon carbide abrasive grains cut fast and produce a consistent, uniform finish.

Anti-Slip Paper Backing

Waterproof

Silicon Carbide Sheets (CC)

The world's most reputable wet sanding paper for its durability, speed, and extremely uniform abrasive grains. Sharp silicon carbide abrasive grain is resin-over-resin bonded on a highly flexible anti-slip backing that requires no pre-soaking before sanding.

Aluminum Oxide Sheets (AO)

Premium aluminum oxide abrasives and full resin bonded; this heavy-duty waterproof paper is engineered for both machine and hand sanding in achieving a consistent and uniform finish. Extreme durability and fast cutting speed make this paper an ideal choice for the most demanding jobs.

Finkat PS

Super-Tack Discs & Sheets

The convenience of velour backing, much cooler sanding and superb finishes are some of the reasons that, since its introduction, Eagle SUPER-TACK abrasive paper has been well accepted by more and more professionals who demand the best for their jobs.

Finkat PS

For those tough, demanding sanding jobs, use Finkat PS abrasive paper. It utilizes a premium abrasive mineral and a special bonding method for faster, tougher performance while still maintaining an excellent uniform finish.
